Focus On Our Visitors

HARFORD JUNIOR COLLEGE
BEL AIR, MARYLAND

Administration Building

Harford Junior College, Bel Air, Maryland, is typical of the nation's growing interest in higher education. Begun in 1957, the college moved to its present, permanent Bel Air site in 1964—a 204 acre campus beautifully situated in the rolling hills of Maryland. Today, Harford Junior College boasts of being Maryland's largest and most modern junior college facility. The campus, truly a scene of progress, consists of a new library, a science building, administration building, and temporary homes for the student union and gymnasium. Under development and construction are the new Vocational-Technical Center, a College Center with a little theater, a gymnasium, and a fine arts building.

A Tree-Covered Campus Road

A two year school, Harford Junior College provides both a day and evening program with a variety of courses ranging from art to physics to the local community. Successful graduates are eligible for transfer to a senior institution where they may complete requirements for a baccalaureate degree. In addition to the long range program, the philosophy of Harford Junior College provides service for educating individuals who wish training and background for employment in technical and business fields at a semi-professional level.

The athletic program is growing at Harford along with the academic and physical growth of the institution. This year, for example, is the first year for Harford's football team. We wish our neighbors at Harford Junior College best of luck with their 1966-67 football season.
